Biogeometry shapes & methodology for biological energy balancing

[[PDF](#)]

Abstract

Geometric shapes and techniques, along with the methodology behind them, invented to produce a qualitative energy balancing effect on biological systems, be it human beings or otherwise. This results in a positive effect on biological functions, either preventative or healing, and protection from environmental energy disturbances. The methodology introduced by the inventor is the discovery of the qualitative energy components of earth energy power-spots {specifically those components are qualitative higher harmonics of the frequencies of gold and ultra-violet, and a carrier wave in the negative green of the energy spectrum} and development of geometric shapes and techniques to reproduce and amplify that energy balancing quality. This methodology has been termed/copyrighted "BioGeometry" by the inventor. The geometric shapes and techniques work either directly through proximity to the biological system or from within its surrounding environment, or by superimposing on a radiating energy source that reaches the biological system. The two techniques are: (1) Using two of the shape (FIG. 4) as geometric polarizers and orienting them in relation to a central axis to produce the energy balancing quality as in (FIG. 7) and termed "BioGeometry Dial", (2) Using shape (FIG. 4) as an individual geometric polarizer and aligning samples of materials from the biological system itself or its environment to produce the energy balancing effect (FIG. 8) and termed "Energy Balancing Wheel" when in two-dimensional form and "Energy Balancing Sphere" when in three-dimensional form.

Biosignatures: linear diagrams for biological energy balancing
[[PDF](#)]

Abstract

Linear diagrams (FIGS. 1 to 247) tracing and corresponding to the functional paths of subtle energy flow within the organs of the human body to restore proper flow and energy balancing through resonance. This results in a positive effect on biological functions, either preventative or healing, and protection from environmental energy disturbances. The diagrams are activated by the body's peripheral energy field, which is channeled through the linear diagrams, and enters into resonance with the functions of the organs they correspond to. The energy balancing effect and restoration of proper energy flow within the organs can be introduced by the diagrams either by proximity to the human body, or by superimposing on a radiating energy source that reaches the biological system. These linear diagrams have been termed and copyrighted "BioSignatures" by the inventor.

Biological quantum balancing cabin

[[PDF](#)]

Abstract

The invention discloses a biological quantum balancing cabin. A cabin body is of an oval or round sphere shape. Electric energy beams are led in the center of the cabin body or light-guide fibers pass through the center of the cabin body. A light source connected with the light-guide fibers is arranged. The cabin body is respectively provided with a superconductive polymerization energy board, a thermal conductive board, a thermal conductive insulating substrate, a shielding board, an upper structural framework, a secondary shielding board layer from inside to outside. An energy substrate is arranged on the upper structural framework. An energy water source is led into the energy substrate. The cabin body is of an arch spheroidal physical structure. The middle part of the cabin body is provided with a cylinder which carries out decelerated motion by a reducer. A conductive sliding ring on a motor shaft can lead strong and weak electricities into the cylinder to form a cathode and an anode. According to the fluid motion of the cosmos and the theory of the formed cosmos field, the biological quantum balancing cabin is characterized by simulating the cosmos environment of light, electricity and field and acts on and balances the human

body by resonance of a magnetic field and a wave field of physical energy and biological energy and matter compound information so as to make the matter in a relatively stable state according to a balance law.

**DEVICE FOR NEUTRALIZING THE NOXIOUS RADIATIONS AND FOR
RECHARGING AND BALANCING THE ENERGY OF LIVING ORGANISMS
[[PDF](#)]**

Abstract

The invention relates to a device for neutralizing the noxious radiations and for recharging and balancing the energy of living organisms as a parallelepipedic capsule made of alimentary plastic material, wherein there are included active biological components. The components comprise an image printed on a paper carrier, a plant mixture as powder, marble dust and cat hair.

**Quantum ecological energy field system
[[PDF](#)]**

Abstract

The invention provides a quantum ecological energy field system, and the system can generate a quantum ecological energy field which is suitable for human physiological states. The quantum ecological energy field acts on human bodies, and generates quantum resonance, quantum entanglement, and quantum superposition effects with a biological electromagnetic field of a human body, and physical effects are converted to biological effects, so as to adjust the human biological electromagnetic field, and balance and improve human life energy and information. The quantum ecological energy field acts on human meridian points, and can dredge channels, and promote qi to activate blood. The quantum ecological energy field acts on human genes and cells, and can activate non-active genes and activate cells. The system has effects of supplementing body energy, strengthening body immunity, improving human spontaneous healing, balancing and regulating blood circulation, promoting metabolism, improving sleep, relieving physical and mental fatigue, preventing and treating chronic fatigue syndrome, sleep syndrome, cardio-cerebrovascular diseases, osteoarticular diseases, and geriatric syndrome. The system is suitable to be used in homes, convalescent homes, old people's homes, hospitals, hotels, and is used for daily sleep, office work, and life cultivation and health preservation.

**Method for adjusting life decoding energy
[[PDF](#)]**

Abstract

The invention provides a method for adjusting life decoding energy, comprising the step of adopting a sealed device capable of allowing people to enter, wherein the device is provided with an accurate temperature control system, a germanium energy system, a quantity-controlled far infrared system, an anion generating component, a frequency spectrum system

and a scalar energy manufacture system of a thermal system; and the device is used for balancing, polymerizing and amplifying the bio-energy by the systems and the components, and wholly and systematically adjusting the universal energy and the environment energy. According to the method, the biological cells can be activated and the energy absorption can be assisted according to the energy medicine, so that the communication between the body energy substance and the body energy system can be realized, and the activity of human cells can be quickly started. The method is simple and scientific to realize, and high in safety, so that the mortality of the cells can be effectively reduced, and the nursing requirement on the human health care and health can be met.

Vibrating system for protection against radiation interference ...

Abstract

Vibrating system for protection against radiation interference emitted by viewing screens and/or other sources of radiation, bio-energy balancing and geo-biological harmonisation or bio-cleaning of work places and homes

Vibrating protection system making it possible simultaneously or separately to provide the user with protection against radiation interference emitted by viewing screens and/or other sources of radiation, to induce and protect the bio-energy balance and geo-biological harmonisation or bio-cleaning of work places and homes, and to correct and protect the electro-magnetic fields of the human body as well as the energy balance of acupuncture meridians. System specifically composed of a recipient in transparent white glass containing a solution of pure vegetable extracts, based on Nigella (all varieties included), with a very high vibrational content, of a colour that is initially reddish brown and which becomes lighter as it becomes saturated to end up a greenish yellow colour.

Energy shoe...

[[PDF](#)]

Abstract

Energy shoe characterized in that by a pressed stimulation produced by applying magnetic members to an exercising foot, the purposes of smoothing and activation of acupuncture meridians can be achieved.

An energy shoe which is manufactured by: mixing and agitating silicone gel material and powder material having ultra-long wave energy to form a substrate; placing a plurality of magnetic members on the substrate obtained in the first formation, wherein anodes and cathodes of the magnetic members are arranged in an interlaced pattern and at intervals, and then coating the raw material mixed from silicone gel and ultra-long wave energy substance on the substrate having the arranged magnetic members by a second formation, so as to obtain a shoe material for manufacture of a shoe body; and using said shoe material to manufacture a sole, an upper, a tongue, etc., so as to form a structure having coated magnetic members and ultra-long wave energy substance. While wearing the shoe, a foot is covered by an intact space formed by the magnetic members and the ultra-long wave energy substance of the shoe body. the magnetic energy and the ultra-long wave energy on the acupuncture points of the foot, the effects of strengthening and balancing human body's biotelecommunication signals or bioelectrical activities or bioelectrochemical reactions, enhancing blood circulation,

restoring vascular tension, improving blood supply, improving the organ with functional blood circulation disorders, regulating autonomic nerves, promoting myocardial bioelectrical activity and systolic function, strengthening the activation of brain nerve cells, biological muscles and nerve conduction, facilitating metabolism, anti-oxidation and free radicals resistance can be achieved. In addition, through a pressed stimulation produced by applying the magnetic members to an exercising foot, the purposes of smoothing and activation of the acupuncture meridians can be achieved.

Far-infrared electric pulse biological Yin-Yang harmonizing instrument using micro-needle rare earth magnetic therapy

[[PDF](#)]

Abstract

The invention designs an intelligent far-infrared electric pulse biological Yin-Yang harmonizing physical therapy healthcare apparatus using micro-needle rare earth magnetic therapy based on a singlechip microprocessor. By a system, the traditional moxa-moxibustion is replaced by a nanometer far-infrared material, so that the system is high in infrared radiation ratio and high in hyperthermia and has penetrating acupuncture points. The singlechip collects the body temperature of a patient by a temperature sensor and controls the output of far-infrared rays; pulse acupuncture is controlled by the singlechip and amplified and output by a boosting circuit; the change of electric pulse is realized by software programming; the amplitude and the frequency of the electric pulse can be adjusted according to the requirement of the patient; technologies of rare earth magnetic therapy, liquid medicine transdermal absorption, far-infrared thermal therapy and electric pulse microneedle therapy are combined at the same time; and the magnetic therapy is performed by using a rare earth permanent magnetic material, so that the magnetic energy product ratio is high, green magnetic field is permanently generated, and the electromagnetism balance of living organism is adjusted. By the technology of liquid medicine transdermal absorption, the liquid medicine with functions of nourishing Yin and warming Yang is utilized to generate an adjustment function on the human tissues; and by the system, the technologies of far-infrared thermal therapy and electric pulse microneedle therapy have functions of timing and displaying, and different treatment schemes are combined, so that the apparatus is simply and feasibly operated.

Bio-information capture and storage device

[[PDF](#)]

Abstract

A bio-information capture and storage device includes a bio-information receiving and processing device, a bio-information digital processing device and a bio-information storage device. The bio-information receiving and processing device is electrically connected with the bio-information digital processing device, and the bio-information digital processing device is electrically connected with the bio-information storage device. Compared with the prior art, the bio-information capture and storage device has the beneficial effects as follows: through the bio-information receiving and processing device, the bio-information digital processing device and the bio-information storage device, the response of artificially

stimulated bio-information fluctuation and the change of materials or energy can be effectively filtered, thereby improving the holographic bio-information capturing integrity of plants and natural ores, synchronously balancing the amplification frequency of biological waves, sending and receiving different frequencies of bio-information, improving the density of storage information and anti-interference performance while improving the transmission efficiency, and reducing the bio-information collection and acquisition delay time.

Multifunctional health-care bathroom

[[PDF](#)]

Abstract

The utility model provides a multifunctional health-care bathroom comprising a bathroom system and further comprising a health-care system and an entertainment system, wherein the health-care system and the entertainment system are respectively mounted on the bathroom body in the bathroom system. By using the structure, the multifunctional health-care bathroom of the utility model can achieve the effects of relieving the fatigue, relaxing the muscles and tendons, stretching the body, refreshing the brain and promoting the whole body blood circulation through bath therapy, so a user can feel fully relaxed, comfortable and refreshed; by combining infrared thermal therapy, the multifunctional health-care bathroom can smooth the meridians, qi and blood and open the whole body pores through temperature-rise radiation, thus achieving the effects of dredging the meridians, improving the blood circulation, promoting the circulation of qi and blood and balancing the internal organs; and the multifunctional health-care bathroom can regulate the neurological functions, regulate the body information and internal biological energy, promote the metabolism and improve the human immunologic function, thus achieving the purpose of building the body and preventing the diseases.
