**US Navy Undersea Submarine Bases**

---

A sends:

All of the illustrations are from the USSA Navy's "Rock Site" Undersea Base R&D Program at China Lake Naval Weapons Station in California, circa 1966. These are the original illustrations done by Walter Koerschner, the military illustrator attached to the project, and personally passed to me by him almost 15 years ago.

The illustrations must be credited as follows:

Walter Koerschner, military illustrator for US Navy "Rock Site" R&D Program, China Lake Naval Weapons Station, California, circa 1966.

These illustrations are Copyleft. No one holds the rights to them. They may be used, but not sold as such. They are in the public domain. They were freely given to me by Walter Koerschner with the intent that they be published, and I freely give them to the world public. I provide much more context and explanations for these images in my book, *Hidden in Plain Sight: Beyond the X-Files*, which may be purchased at this link:

<https://www.adventuresunlimitedpress.com/proddetail.php?prod=HIPS>

Walter Koerschner will be pleased. He's deceased, but no doubt that he's looking on with approbation!

From what I have been told, these facilities are on the continental shelves of the Americas, in the Gulf of Mexico, and in seamounts. Off the coast of Brazil and Argentina, along the Eastern Seaboard, in the New England Seamounts, the Caribbean (Bahamas, Puerto Rico, etc.), Gulf of Alaska, in the California Channel Islands, off of Monterey, California, beneath Lake Erie, etc., as well as mid-ocean, like the North Atlantic, for instance. Any body of water from the North Pole to the South Pole. Indian Ocean, Mediterranean Sea, any of them.

I just don't know \*\*where\*\* they are. Evidently, some of them are joint terrestrial-extraterrestrial facilities. Lots of UFOs are seen going to and from the ocean. There's a reason. Siemens seems to be involved, as well as Brown & Root, Lockheed, Bechtel, Black & Veatch, Parsons, etc. The Vatican, the USSA Navy, the USSA Army Corps of Engineers, the NAZI Party (oh, it's still a thing), the CIA, a nameless body that I have variously heard referred to as the "Organization" or the "Company".

Suffice it to say that the coordinating arrangement is much different than what we were told in our high school civics classes. High school civics = government for stupid, dumbed-down slaves. The same goes for most of the political science courses in the universities. It's very disappointing. It's all Grade-A Shit.
